ILLUMINESSENCE™

NEON

INDOOR/OUTDOOR
LED LIGHT STRIP

DESIGN GUIDE

MLB7-1033-RGB

v1.0 0920

GETTING STARTED

Thank you for choosing the Neon Indoor/Outdoor LED Light Strip by Monster Smart Illuminence. This **Design Guide** will help you with creating your Neon wall art.

Please consult the Quick Start Guide for all setup and installation instructions.

DESIGN TIPS

- Before installing, try out different designs with your Neon on the floor or a table to decide what you would like to create! Shape your design and use tape to hold it in place. Make sure that you have enough mounting clips for each piece of tape, this will ensure your design looks the same on the wall.
- Plan to install your Neon near enough to a power outlet for the adapter cord to reach - ensure it is not a tripping hazard.
- Want a bigger design? You can easily group multiple Neon strips together in the Monster Smart app in order to control them as one.
- **Save these instructions for future reference.**

BASIC USE

LINES AND CURVES

Neon's flexible, water-resistant housing makes it perfect for edge-lighting large outdoor spaces like decks, patios, and walkways. It is also great for illuminating large indoor spaces with the look of premium, diffused lighting.

easily create both straight lines and curves

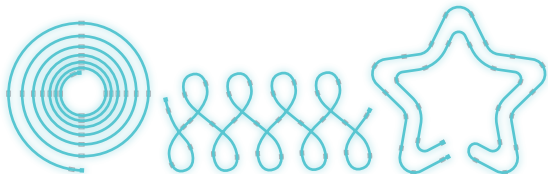

TIP: When installing, space your mounting clips closer to curves and corners to better secure the strip around turns, then use fewer on straight areas.

ADVANCED DESIGNS

CREATE CUSTOM SHAPES

The exceptionally flexible LED strip can also be used to create artistic, neon-style lighting designs to enhance any decor.

These designs and more can be made with 1 full Neon light strip.

WRITE MESSAGES

Illuminate your home or office with glowing cursive messages.
